Keeping Energy Dollars in Minnesota

UpTake Video by Bill Sorem Available for 9/27 Program - "Terrific," "A wealth of information," "A primer on renewable energy" Watch:

http://tinyurl.com/5t5pye8

Moderator - John Doll, Business Owner, former State Senator and Vice-Chair of the Senate Energy Committee

Lynn Hinkle - Policy Development Director, Minnesota Solar Industries Association

The Green-Blue Alliance: Solar Energy & Labor Issues in Relation to Clean Energy Development

"Renewable energy is an enormous jobs engine for MN."

John Farrell - Director, Energy Self Reliant States and Communities Program, Institute for Local Self Reliance

How Distributed Wind Development Can Grow Jobs and Contribute to Economic Development in Minnesota

"MN has a tremendous potential for getting electricity from renewable resources, but an even larger potential in terms of what the economic opportunity could be."

George Crocker - Executive Director, North American Water Office

Importance of Community Organizing for Developing Distributed Renewable Energy

"Until enough people figure out how to actively pursue their interest, their community's interest, in securing the benefits that John and Lynn talked about ... the power of organized capital will prevail. Organized people can beat organized capital every time that the people are organized. The problem is that they're not."
